Composite cans

Industry overview:

The uniqueness of composite cans comes from the combination of being light and having special attributes, for example good barrier properties against oxygen, water vapour, light, odours, and aromas as well as high splitting resistance of coreboard base. The absolute consistency of board properties is essential in terms of thickness, smoothness and rigidity when making composite cans.

Why choose Corenso:

We have developed an array of products that meet the above mentioned needs. Our state-of-the-art machines keep us at the forefront of technical and product development, allowing us to ensure the same product quality in all deliveries.

**More than
the core.**

Reliability

- High and consistent quality
- Strong board-making expertise
- Continuous improvement practices
- On-time and accurate deliveries
- Sharing best practices

Trust

- Flexibility
- ISO certifications
- FSC certification in part of the mills for traceability of raw material
- 100% recycled board
- Dedicated sales and customer service team always at your service
- Full technical assistance for trials and whenever needed

Commitment

- Corenso is your long-term partner striving to find the optimal solutions for your business
- Powerflute is committed to investing in and developing the business

Benefits

- High production speeds guaranteed due to consistent board characteristics
- Guaranteed net weight per canister
- Clean surface without contaminations
- Smooth surface when laminating cover ply for high impact visual display at point of sale
