Corenso announces investment in a new multi-knife cutter to strengthen its product offering and improve service and quality for film and flexible packaging customers of its operations in Germany

Corenso is pleased to announce completion of the latest in a series of investments in its core converting operations in Germany. The core plant in Krefeld is now equipped with a new in-line high-speed multi-knife cutting system which will enable it to better meet the ever-increasing quality requirements of customers, especially those in the film and flexible packaging markets. The additional capacity and flexibility created by the installation of the new cutting system is also expected to deliver benefits in other areas and enhance our ability to deliver customized high performance cores to both current and new customers.

The investment in the in-line multi-knife cutting system has been made to support Corenso's plans for future growth in Europe and as part of a multi-year investment program for the expansion of its core converting businesses worldwide. This investment is part of Corenso's global initiative to improve efficiency in all production facilities.

Last year Corenso announced the completion of a major program of investment in its research and development centre located in Krefeld, Germany.

About Corenso: Corenso is one of the world's leading producers of high-performance cores and tubes as well as high-quality coreboard and packaging board. Corenso operates three coreboard mills and fifteen core converting plants, covering strategic locations in Europe, North America and China. All Corenso products are made from recycled raw materials, designed to meet the specific needs of various industries. Our operations are based on long-term partnerships with customers, continuous development and innovation.
