

Applications areas for Corenso cores:

Metal

Our customers' needs vary greatly when it comes to cores for metal. Corenso is dedicated to meeting these requirements. We are able to deliver cores with high dimension or extra high wall thickness, cores with solid and stable sizes in order to be able to carry heavy weight, special outer ply to prevent markings as well as inside cores to protect the coil from damage. We are also able to produce demanding tailored products and solutions, including heat protection.

Why choose Corenso:

Corenso has decades of experience and expertise, which we use to meet the needs of our customers in the metal industry. We produce a wide range of cores with a diameter of up to 700 mm and wall thickness of up to 50 mm. Upon request, we are also able to produce cores with a wool felt surface. Our extensive research and development and state-of-the-art technology helps ensure that Corenso cores are always made to meet and exceed all your expectations.

End use areas

- Rolled material: high strength, smooth surface
- Convolute cores: high wall thickness

Reliability

- High and consistent quality
- Continuous improvement practices
- On-time and accurate deliveries
- Sharing best practices

Trust

- Flexibility
- ISO certifications
- Dedicated sales and customer service team always at your service
- Full technical assistance for trials and whenever needed
- We know the machinery suppliers and can supply the right cores for specific machines

Value-added services

- Stock management
- Core handling
- Returnable packaging
- Customised deliveries
- Core Audit™

Long-term commitment

- Corenso is your long-term partner striving to find the optimal solutions for your business
- Owners are committed to investing in and developing the business
